

Dear Liberal Government

The Australian Liberal Government is completely out of touch with reality by attempting to cut back the area of oceans Australia protects at all, let alone by 50%.

It is short term, capitalist thinking that will effect generation of Australians to come.

Their names will certainly be remembered by generations of Australians that will need to fix the environmental disasters that will result from an assault on the oceans.

As a mother, I hear what parents are speaking about, and it is mostly about the future that our children will encounter - and with this government at the helm it does not look very bright.

If the government want to take any action in our oceans - it should be to expand protected area - not cut them back.

We hold you accountable and responsible - short and long term.

Kind Regards

Eva Gregorich
