

Please forward the following submission from me - It is ESSENTIAL that our ocean protection is NOT rolled back! It is vital that our ocean protection is preserved, in light of a very uncertain future. Our oceans are warming, climate change is real and loss of some species imminent! Our marine ecosystems need all the support we can give them to survive. Our oceans are also under increasing pressure from illegal fishing and whaling. So, the ecosystems need all the support they can get. Please protect our marine life and its associated reef areas.

Yours sincerely,
Vicki Carman-Brown
