

Every day I read of the worsening conditions for wildlife across the globe  
Without protection wildlife does not stand a chance against the growing human population  
I ask you for the sake of the voiceless marine community to understand the imperative to keep  
these protections in place  
Removing protection for the marine environment opens it to commercial exploitation  
The vision of a world with no appreciation for or understanding of the web of life's  
interdependency is a terrifying one  
No beauty no awe no respect  
Save our marine protected zones as they are  
And be a beacon of rational in a world in thrall to the \$\$\$\$\$\$  
Yours sincerely  
Kerry smith
