

Please stop the destruction of many marine habitats by removing restrictions on what can be done in so many of them. Fish need reserves where they can breed and multiply. If fishing is not restricted there will soon be no fish left to eat. The use of nets is also dangerous. Many marine animals and fish are caught and killed by these nets, including many which are of no use to us. We do not know whatr will be the outcome for humanity if the seas become barren, and I , for one, don't want to find out. GThere are probably still many species living in the oceans that we don't e ven know about yet and some may prove to be of great benefit to us. Please preserve marine parks.

Yours sincerely  
Miriam Tonkin
