

Cut backs to ocean protection in Australia's oceans will make Australia the world leader in winding back protection for the oceans.

In the Coral Sea alone the area placed in Marine National Parks has been halved. The same goes for Marion Reef. Even Osprey Reef, one of the top dive sites in the world has had half its area removed from the Marine National Park. **Shark and Vema Reefs have been taken out of the Marine National Park area altogether.**

Midwater trawling is to be reintroduced and it will be now be possible for long-lining to start at the southern tip of the Coral Sea reserve and continue all the way to the northern boundary.

Please stop cutting our marine protections for future generations.
